

GPDP Analysed Report of GP Karian

Plan Description-

GP Karian of Mehla block has selected **Theme 5**, which is '**Clean and Green Village**', for 2025-

26. Besides that, they have also included one more theme-

- I. Theme 6 – Self-sufficient infrastructure village.

Planned Budget-

- **Total amount allotted- 1719004 (Tied), 54899336(Untied)**
- **Total planned outlay- 1719004(Tied), 55499336(Untied)**

Lapses-

I. Section 2: Sectoral View

Sectors selected-

Administrative and technical support, Agriculture, Drinking water, Education, GP office infrastructure, Land improvement, Maintenance of community system, Nonconventional energy sources, Roads, Sanitation and Social Welfare.

Suggestions-

Though they have almost covered all the sectors, but still few sectors can be included in the GPDP for the overall development of the community, such as-

- Economic Development and Livelihood
- Environment and Sustainability
- Women Empowerment

II. Section 4: Planned Activity Details Funded by Panchayat

- In this section, they have planned 7 activities regarding **awareness camp – Activity 2, 3, 4, 5, 7, 9, 10**. For these activities, they have planned a budget of **6 lakhs 20 thousand**.

Suggestions-

These camps can be planned in such a way that the Panchayat can minimise the amount and utilise the rest amount in the other interventions area.

- They have included four activities regarding **the clean-up drive – Activity 6, 11, 12 and 24**. For these activities, they have allotted a budget of **2 crores and 5 lakhs**.

Suggestion-

This activity can be planned in a way where the amount can be utilized for the other activities focusing on **sanitation**, such as **installation of separate dustbins for wet and dry waste in the populated areas**. For instance, the market area.

***The Anganwadi located in ward no. 5 has been facing a problem of people throwing waste in their backyard. They neither have boundary walls nor dustbins placed in that area. This problem needs to be solved as soon as possible. As constructing of boundary walls is a time-taking process, for now installing dustbins can reduce this problem.**

III. **Section 5: Planned Activity Details Funded by Other Departments**

In this section, the activities that they have included do not have a proper plan of implementation. And they have also not mentioned the descriptions of a few activities; they have put the scheme's names in the section of activity description. For instances,

- **Activity 2:** Plastic Pollution
They do not have a proper plan of the process for how they will reduce plastic pollution.
- **Activity 5:** Human Wildlife Conflict
They have planned a budget of **10 lakhs**, but as mentioned above, they do not have a plan of how they will resolve the conflict.
- **Activity 1:** Deforestation.
Activity Description- **Ayushman Bharat**, Scheme name- **Ayushman Bharat**.
- **Activity 6:** Deforestation.
Activity Description- **Pashudhan scheme**, Scheme name- **Pashudhan scheme**.
- **Activity 8:** Burning of stubble/crop residue.
Activity Description – **Matsaya Yojna**, Scheme name- **Matsaya Yojna**.

Overall Gaps-

- I. They have not included any activity regarding economic development and livelihood, environment and sustainability, and women empowerment.
- II. Though they have mentioned the activity of waste disposal, they do not have a proper plan for the activity.
- III. They have included a huge amount for awareness camps and clean-up drives, but they have lacked a proper plan to utilize the money more beneficially.
- IV. There are many activities in section 5, which do not have proper activity descriptions.
- V. They have lacked in including the activities that need to be prioritised.
- VI. Though they have mentioned about installing **Sanitary pad vending machine**, they do not have any abstract or concrete idea for the implementation.
- VII. The awareness camps have only focused on waste management.

Overall Suggestions-

- I. The first thing is to look carefully at the needs of the community and prioritise the activities according to it.
- II. GPDP must include proper activity descriptions aligning with the activities.
- III. Before constructing or installing anything, they should have a proper concrete plan for that object.
- IV. They should cover all the basic sectors of social development for the overall development of the society.
- V. In child development, they can work in conducting community classes for the children of primary.
- VI. Under Theme 6, they can build community toilets and ensure their use. Keeping a person in charge can help ensure its use.

- VII. They should also focus on health and education, including awareness camps on menstrual hygiene and other health-related issues, especially seen in girls or women.
- VIII. Along with the awareness camps, they can also include the activity of health screening, which will often help educate them about health issues, along with medical tests identifying the people need for medical interventions.
- IX. Though they have mentioned about plantation but, it will be more beneficial if they do this activity not in a particular place but in schools, Anganwadi(s), Kitchen gardens, and other public places. This will ensure the continuation of the activity throughout the year, generating awareness on the importance of plantation, and making it a habit, not just an activity for a particular time in a particular place.
